Purchase TuneBoto Video One

TuneBoto offers three subscription plans: Monthly, Yearly, and Lifetime plans.

Quick Link: To purchase a license key for TuneBoto Video One, please visit [here](#).

1. Why should I buy TuneBoto Video One?

You can freely download videos from sites like Twitter, YouTube, Vimeo, and other video platforms using the free trial. However, in the trial version, downloads from premium streaming services such as Netflix, Amazon Prime Video, Disney+, and Hulu are limited to the first 5 minutes of each video. To remove this limitation and unlock full-length downloads, you need to purchase a license and activate TuneBoto Video One.

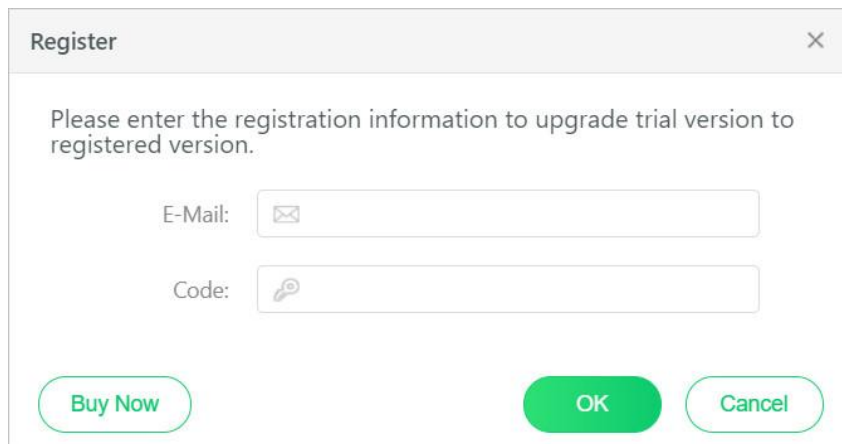

2. What Benefits do we have after Registration?

- Unlimited use during the subscription period without any function restrictions.
- Lifetime FREE upgrades to the latest versions of the same product.
- Lifetime FREE technical support.

Register TuneBoto Video One

Step 1: Run **TuneBoto** on your computer. First you should click the **Menu** icon ☰ or the **Key** icon on the upper right, and then select **Register** option to register your program.

Step 2: Please fill in the blanks with the **Registration Email** and **Registration Code**. You can use keyboard shortcuts to copy (Ctrl+C) and paste (Ctrl+V) your license in the registration window.

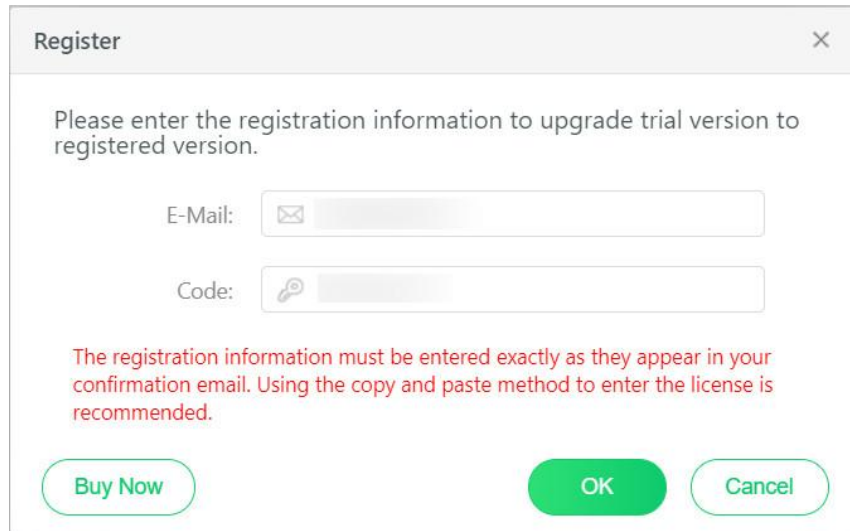

The screenshot shows a 'Register' dialog box with a title bar containing the word 'Register' and a close button (X). The main text inside the dialog reads: 'Please enter the registration information to upgrade trial version to registered version.' Below this text are two input fields. The first field is labeled 'E-Mail:' and has an envelope icon to its right. The second field is labeled 'Code:' and has a key icon to its right. At the bottom of the dialog, there are three buttons: 'Buy Now' (highlighted with a green border), 'OK' (highlighted with a green background), and 'Cancel' (highlighted with a green border).

Step 3: After finishing the Registration, the limitation of the trial version will be removed.

Notice:

1. Your computer should be connected with the Internet.
2. Make sure both the Registration Email and Registration key are provided by our company after you pay the registration fee. If you have not paid, please click **Buy Now** to [purchase](#).
3. Please make sure Registration Email and Registration key you entered are both completely and correctly, if not, an error message will pop up as below:

The image shows a 'Register' dialog box with a title bar containing the word 'Register' and a close button (X). The main content area contains the text 'Please enter the registration information to upgrade trial version to registered version.' Below this text are two input fields. The first is labeled 'E-Mail:' and has an envelope icon to its left. The second is labeled 'Code:' and has a key icon to its left. Below the input fields is a red error message: 'The registration information must be entered exactly as they appear in your confirmation email. Using the copy and paste method to enter the license is recommended.' At the bottom of the dialog are three buttons: 'Buy Now' (highlighted with a green border), 'OK' (a solid green button), and 'Cancel' (a button with a green border).

Register

Please enter the registration information to upgrade trial version to registered version.

- [Main Interface](#)
- [Menu](#)
- [Settings](#)

Installation

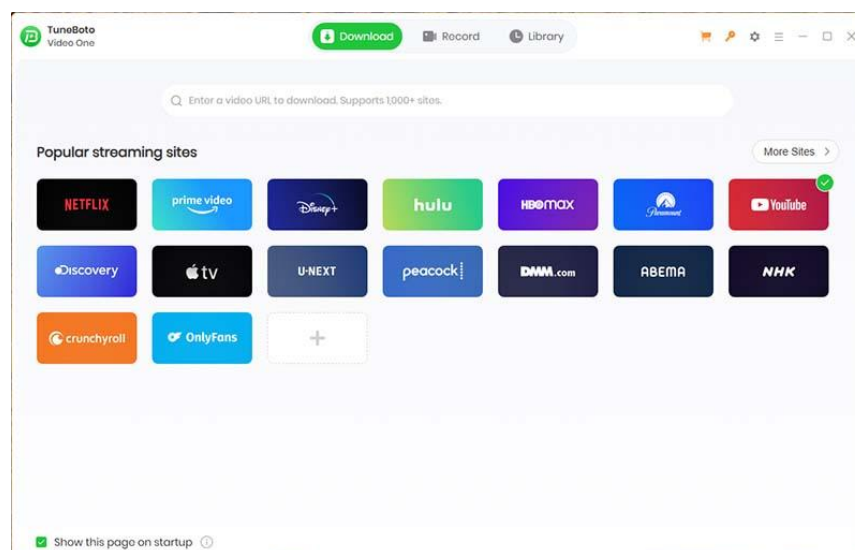

To install the program, please follow the instructions below step by step:

1. Download and install TuneBoto Video One from [Download Center](#).
2. Double click the installation package of TuneBoto to start installing the program on your computer.
3. Follow the instructions to finish the installation.

Note: You can customize the output path for the program as well as create a desktop shortcut icon for convenience during the installation.

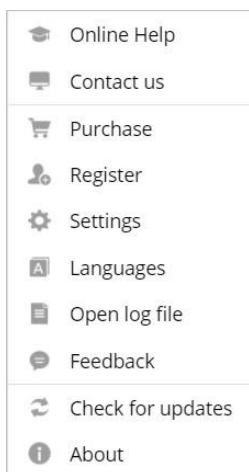

Main Interface

Launch TuneBoto Video One and you will see the main interface as below:

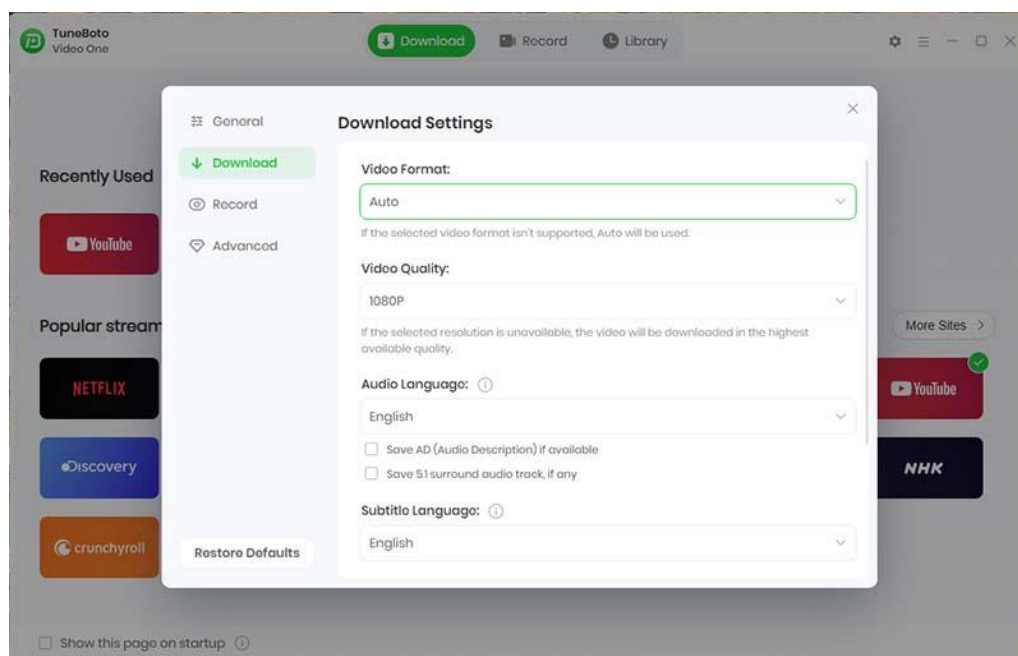

Menu

Click the “**Menu**”  button on the upper-right corner, and you will see a dialogue as below:

Settings

Click the “**Settings**”  button on the upper right, and you will see a pop-up window as below, where you can customize the output format (MP4 or MKV), output quality (High, Medium, Low), output path, audio and subtitles language, etc:

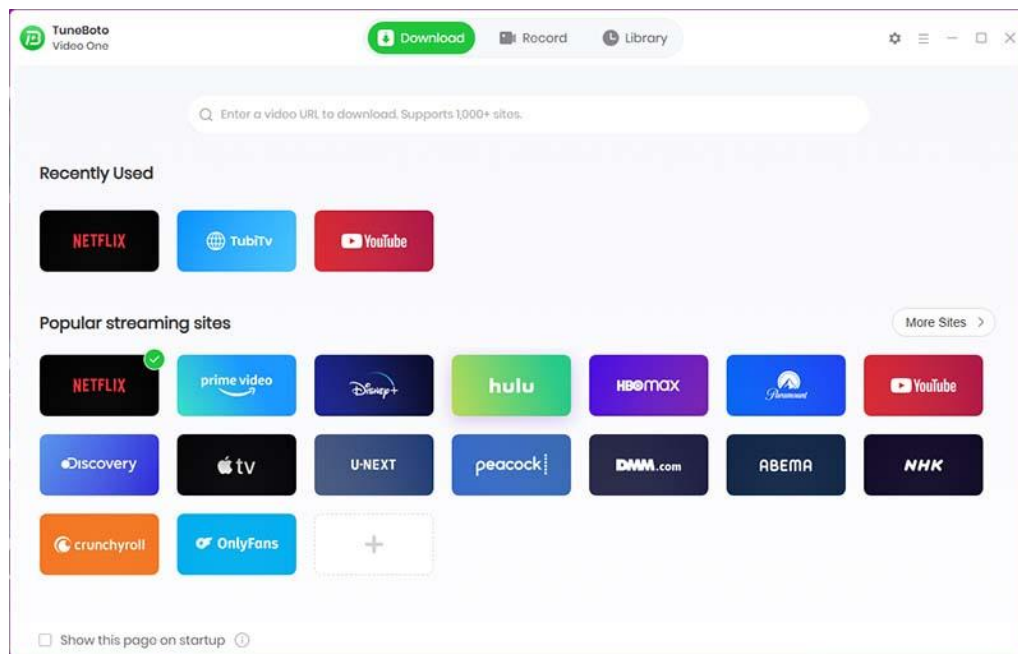

Tutorials

- [Select Website](#)
- [Customize Download Settings](#)
- [Log into Account](#)
- [Load Videos](#)
- [Advanced Download Settings](#)
- [Download Videos](#)
- [Record Videos from Any Website](#)

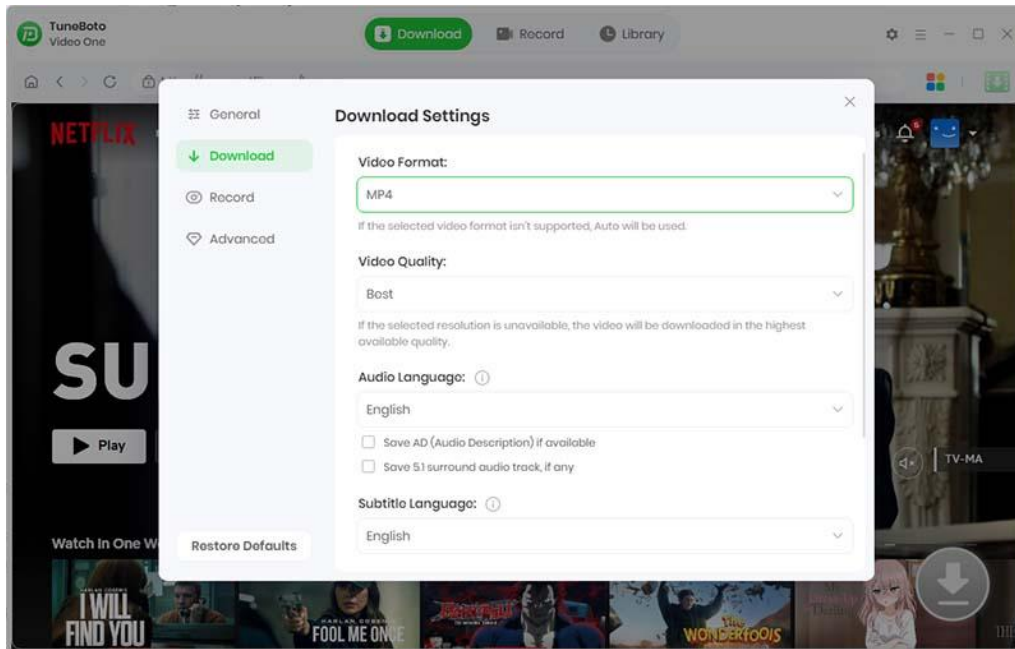

Select Website

Run TuneBoto Video One, and select the website that you want to download videos from. You can enter the keyword to find the site. After selecting, the program will restart to apply the selection.

Customize Download Settings

Then, directly go to the setting window using the Gear icon on the top-right corner, then you can select the video quality, change the output path, and enable the option for hardware acceleration. If you are trying to download video from Netflix, Amazon, Disney+ and Hulu, you can also change the Audio Language, Subtitle Language and more.

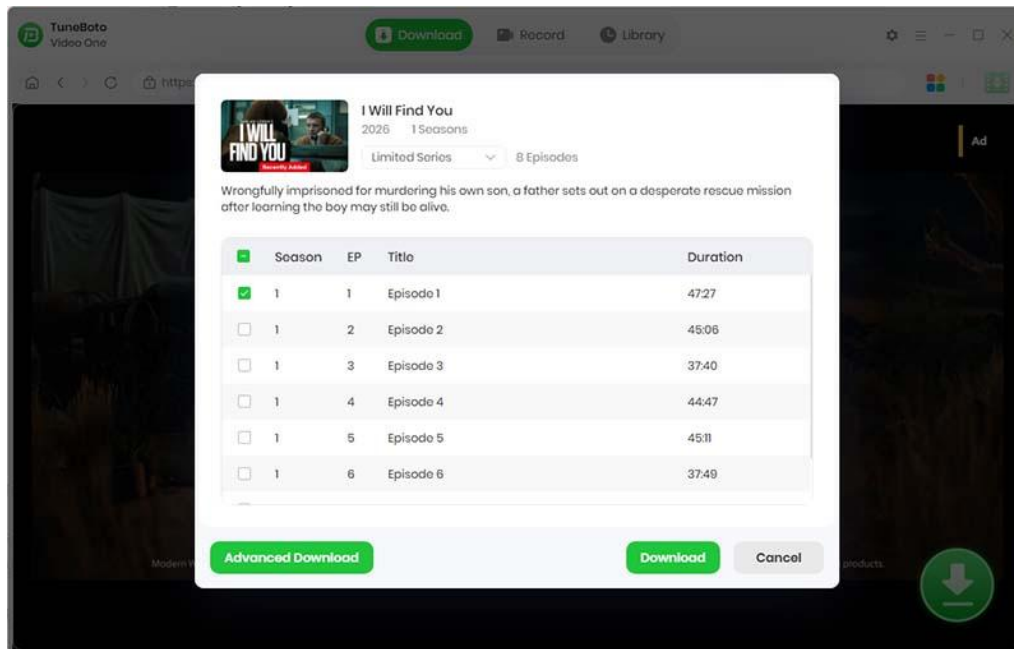

Log into Account

For downloading videos from Netflix, Amazon, Disney+, Hulu, you are required to log into these sites by entering any words to the search box. For recording videos from other sites, please ignore this step.

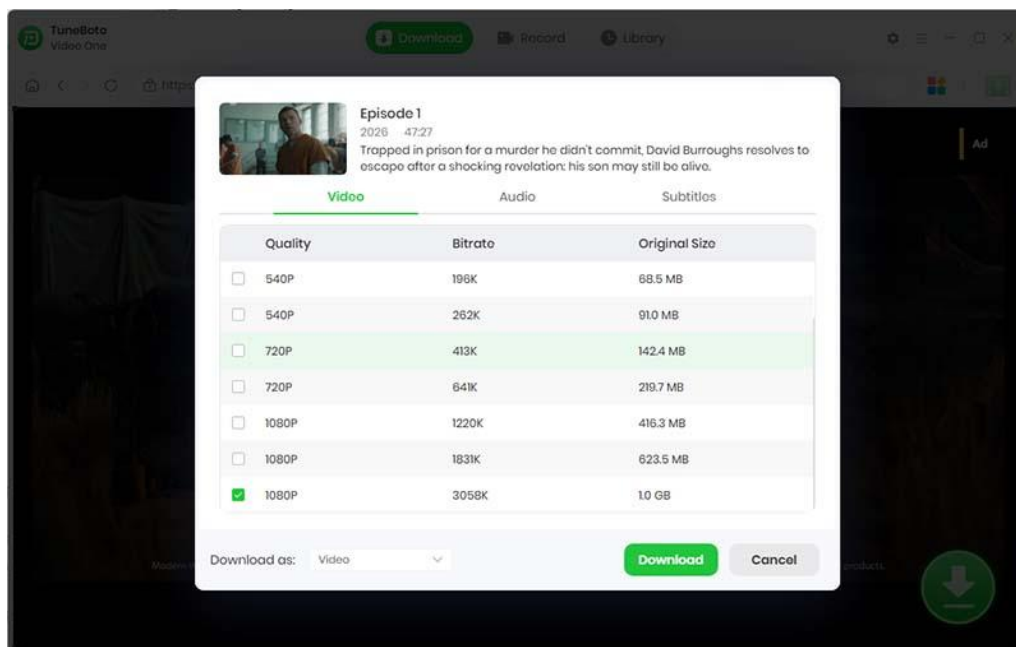

Load Videos

Navigate to your chosen website and log in. You can then add videos either by browsing and opening your preferred content or via the search bar.

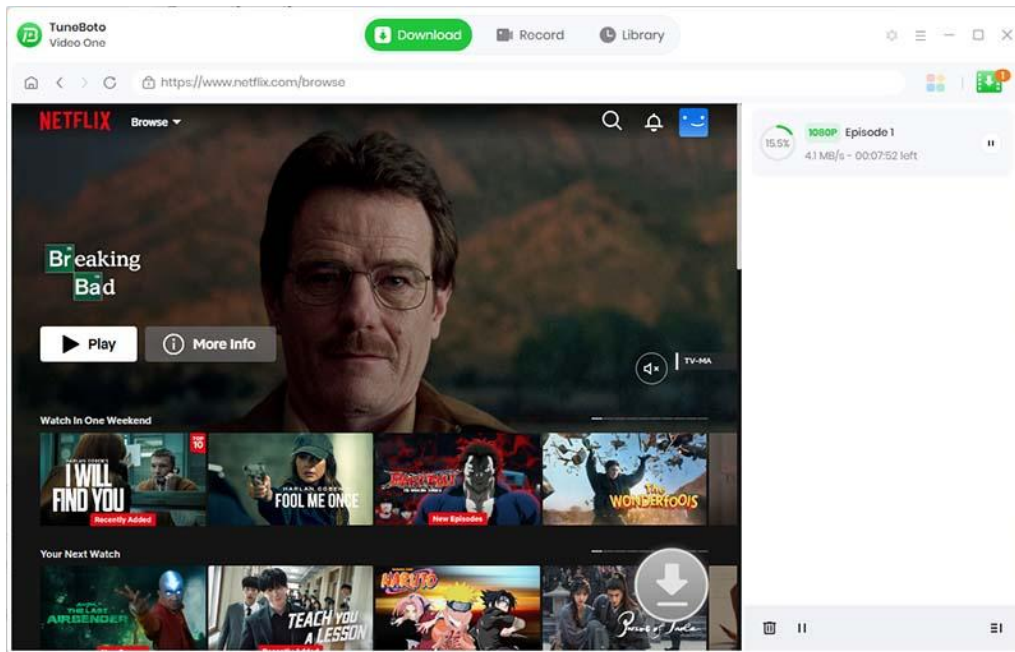

Advanced Download Settings

TuneBoto allows you to select specific video quality, audio track and subtitle track when you are trying to get videos from Netflix, Amazon, Disney+ and Hulu. If you want to download a TV show, simply click the download icon, followed that a window will pop up allowing you to select titles as well as seasons, and to choose audio track and subtitles by clicking "Advanced Download" at the bottom left corner. For downloading a movie, please click the icon beside "Download" to open the window.

Download Video

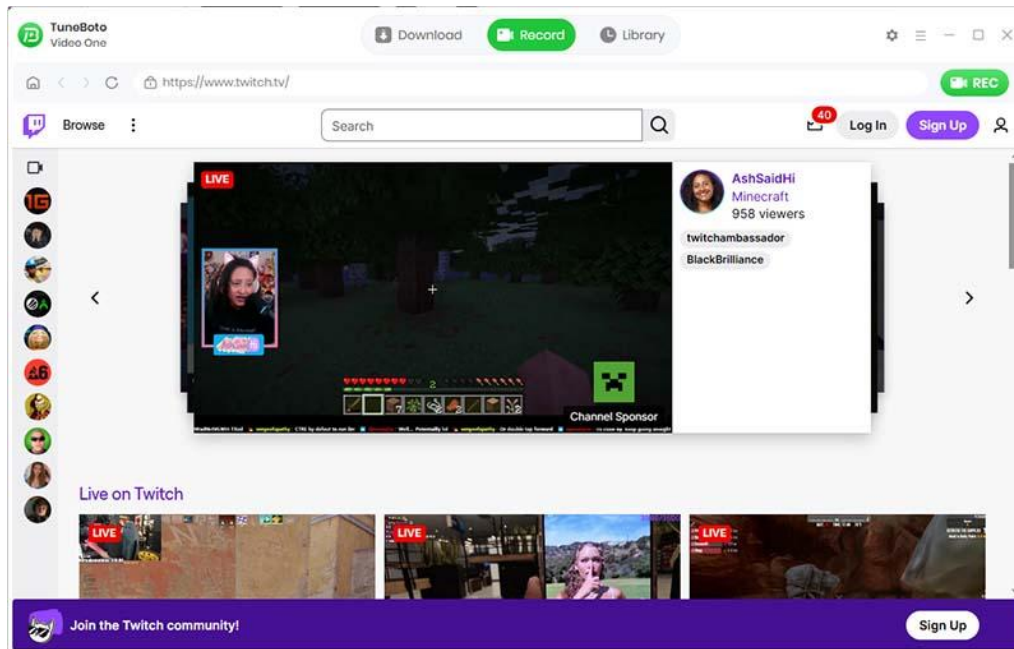

After completing the above steps, now the final step is clicking the **download** icon to start downloading the video to the output folder you've chosen in the previous step.

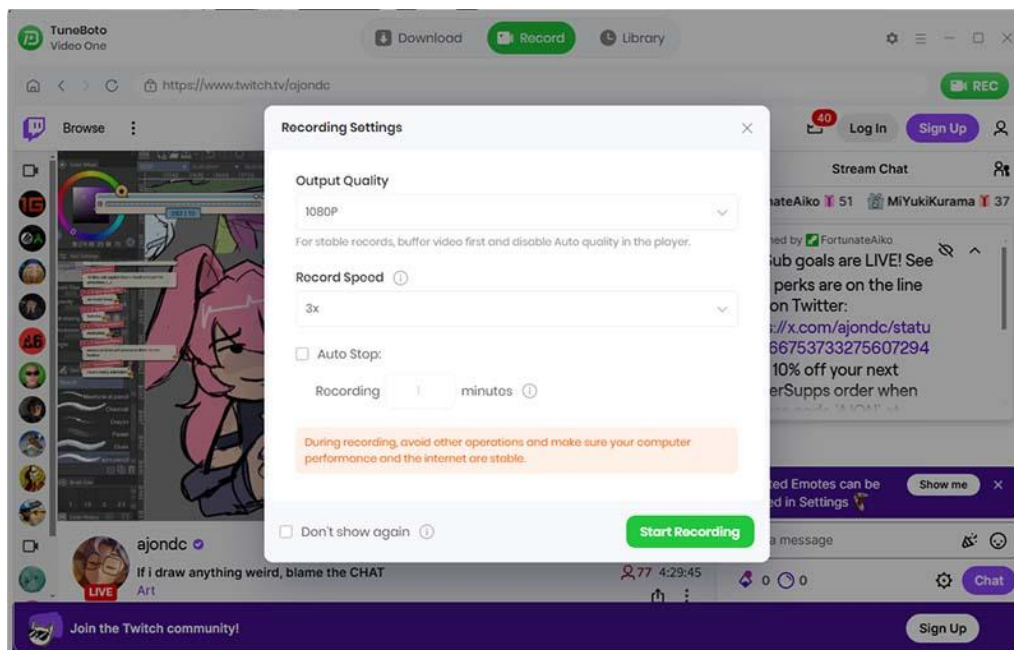

Record Videos from Any Website

The built-in recorder allows recording videos from virtually any website at up to 8X speed.

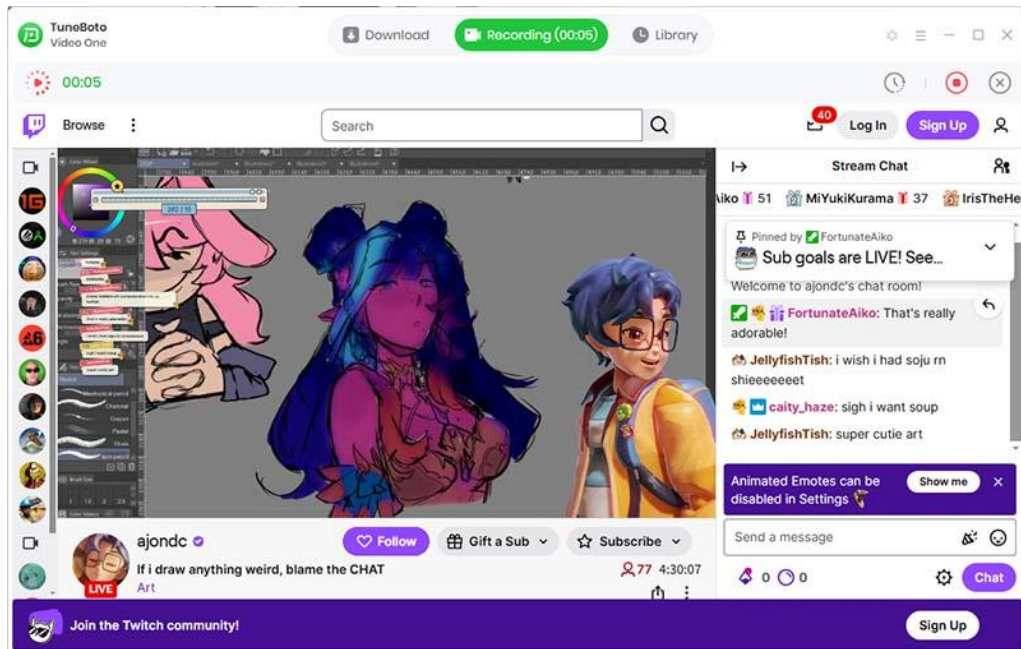

Step 1. Open Recorder Mode, and input the video url you want to record.

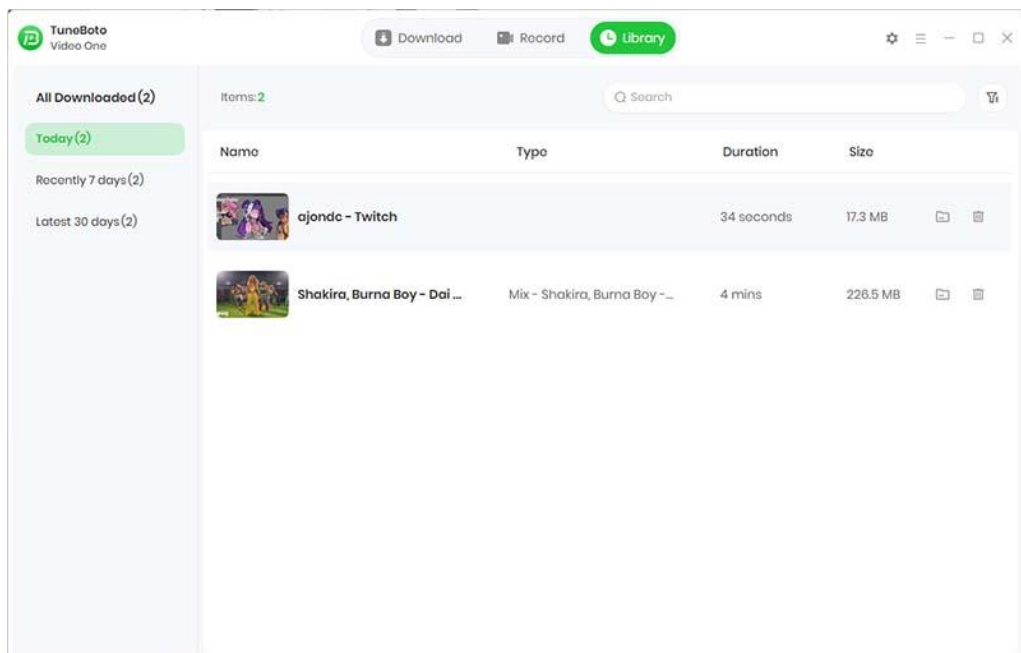

Step 2. Configure Recording

Step 3. Start Recording

Step 4. View Recordings
